Sarah Bendavid

Full-stack developer

Certified and passionate developer, I first taught myself how to code (Html, CSS) before embarking on a complete professional reconversion (Javascript, PHP, Python, etc.). Versatile, I master the different technical stages of creating a site or an application; from front-end development to back-end, including maintenance. In addition, my initial training in human sciences allows me to better understand user needs. These are all assets that have allowed me to create different projects.

WORK EXPERIENCE

Developer – *Freelance*
2023 – Aujourd'hui
Harish, Israel
